Scrum Fundamentals

Relevant information:

I have knowledge and experience in the use of good development practices, such as SOLID principles, Clean Code, among others. I am capable of tackling challenging projects, completing code challenges, and technical assessments. I consider myself a proactive, collaborative professional, focused on the effective achievement of objectives.

Diego Thon

Front-End Developer

I am a professional with over 3 years of verifiable experience as a developer. I have been involved in projects from their inception, including the development of new features and migrations. While I have primarily focused on frontend development, I have also worked as a full-stack developer. I enjoy working in an agile methodology, collaborating with teams in a collaborative environment.

Professional experience

Scientific Archive of the Institute of Archaeology of the National Academy of Sciences of Ukraine | Frontend Developer (Freelance)

11-2023 / 01-2024

I Developed a SPA of a landing page, "Digital Memory Storage," which aims to encompass 2 additional ongoing projects.

Stack:

- ReactJs 18 | Javascript
- Tailwind
- Github
- AWS | S3

VRgroup | Full-Stack Developer (Freelance)

06-2023 / 01-2024

Projects for a client in the financial sector, mainly working for Bice. Among my responsibilities, the following stand out:

- Developing a Progressive Web Application (PWA) for subscription entry.
- Additionally, participating in the development of a landing page for an internal project.

Stack:

- ReactJs | Javascript
- Bootstrap 5.1
- Node.js | Express
- Bitbucket | CI/CD
- Agile methodology: Scrum | Management: Jira

Soho | Front-end Developer

06-2022 / 05-2023

Projects for clients in the financial sector and the private sector, such as:

- **Gasco:** Development of new features for Gasco's new "Online Payment" application, mitigating financial losses for customers by resolving bugs in previous versions that prevented accurate bill payment calculations.

Stack:

- Angular 12 | Typescript
- CSS 3 | ApiRest
- Bitbucket | CI/CD | Jenkins | Sonarqube
- Jira | Confluence
- Jest | Stencil

- **Zurich:** Creation and migration of a new insurance platform.

Stack:

- Angular 14 | Typescript
- Sass | Bootstrap 5.1 | HTML5
- Bitbucket | CI/CD
- Jira | Confluence

- **Itaú:** Development of new modules for a banking platform.

Stack:

- Angular 12 | Typescript
- CSS 3 | HTML5
- Node.js | Express | Api Rest

Everis NTT Data | Front-end Developer

01-2021 / 06-2022

Projects for clients in the financial sector and the private sector, such as:

- **Latam Airlines:** Migration, development, and reconstruction of a flight availability application, achieving a 50% improvement in response performance, thus preventing server outages and failed requests.

Stack:

- Angular 7 | Typescript Sass | Angular Material
- Confluence | Jira | Bitbucket
- CI/CD | Jenkins | Veracode | Sonaqube
- Api Rest

- **Alemana Clinic:** Migration and re-modulation of a patient records and treatment application, achieving the goals of delivering flawless project results. This optimized the client's time in terms of sprints.

Stack:

- Angular 11 | Typescript
- Bootstrap 5.1 | Redux
- Node.js | ApiRest
- AWS lambda
- GitLab | CI/CD | Jenkins
- Jasmin

I developed an application to streamline the sale of plots in the municipal cemetery of Pozo Almonte.

Stack:

- Angular 7 | Typescript
- CSS | Bootstrap 4 | Api Rest. Git
- Trello.

Achievements:

With the creation of this application, the need for in-person visits was eliminated. This streamlined the purchasing process and facilitated communication between the client and the sales representative.
